EDUCATION

The Ohio State University, College of Engineering **Columbus, Ohio**
B.S. Engineering *August 2028*
Major in Biomedical Engineering; Minor in Business ***ACT:** 34/36|**GPA**: 3.8/4.0*

Provost Scholarship: Awarded **$2,000** by The Ohio State University Provost Scholarship for academic excellence and leadership

EXPERIENCE

AI/ML SWE Summer Intern to Part-time @ Winsupply **Dayton, OH**
Internship→Part-time *May 2026-Present*

- **Engineered an Agentic AI system** utilizing a custom Model Context Protocol (MCP) as a capstone project to automate complex e-commerce workflows and navigate vast product catalogs, significantly increasing sales for multiple local companies
- **Integrated e-commerce protocols** (ACP and UCP) to standardize AI access to backend databases, enabling rapid and accurate retrieval of product specifications and inventory data, grounded responses in company data using RAG, and other applications for security
- **Developed conversational AI interfaces** that empower both customers and internal employees to query product information and execute order placements directly through chat, voice command, or PDF uploads to the application

Swimming/Aquatics Instructor (British Swim School) **Fairfield, OH**
Instructor/Coach *January 2025-June 2025*

- Taught water survival techniques to around 30 children, with 95% passing water safety skill tests and demonstrating proficiency in basic swimming strokes, within six months. Earned and maintained current certifications in CPR, and First Aid

LEADERSHIP AND ACTIVITIES

Big Data & Analytics Association (BDAA) Product Development Team **Columbus, OH**
Product Development Consultant *August 2025-Present*

- Developing a single software product to solve operational problems sourced directly from university library stakeholders, translating their prompts and pain points into scoped product requirements.
- Deliver in an agile format with weekly deliverables, stand-ups, and iterative demos and collaborating across a 10 person team.
- Serve as the bridge between business and technical workstreams by aligning stakeholder needs, feasibility, and priorities.

Biomedical Engineering Society **Columbus, OH**
Software Team Lead *September 2025-Present*

- Lead software development for ADAPT, an Ankle Foot Orthosis testing device for Nationwide Children's Hospital's Honda Gait Center, building a Python (Tkinter, matplotlib) user interface for real-time data visualization and export for better understanding of use
- Integrated load cell and IMU sensors with C++ Arduino firmware over a custom serial protocol, coordinating electronics and mechanical design across a 12-person interdisciplinary team

Projects & Entrepreneurial Experience **Cincinnati, OH**
Developer *March 2026-Present*

- **Freelance Full-Stack Dev|Epic Youth OS:** Built and deployed full-stack web platforms for nonprofits and small businesses using Next.js, TypeScript, React, Node.js, REST APIs, OpenAI/Anthropic APIs, and Vercel. Built an operations platform for EpicYouth Columbus featuring grant tracking, CRM, AI-powered autofill, and Google Sheets API synchronization, reducing manual data entry by 50%
- **MIRA AI | Dance Tracker | Pramajna:** Built and deployed three full-stack applications spanning personal organization, dance tracking, and business operations using AI-assisted development and modern web technologies

AI Research Assistant – Brain Tumor Image Classification (Dr. Simeng Zhu) **Columbus, OH**
Research Assistant *September 2025-September 2026*

- Developed seven CNN-based machine learning models utilizing Python (PyTorch) to classify brain tumors from MRI scans and medical imaging using the BraTS dataset, achieving 87% classification accuracy
- Executed rigorous evaluations of deep learning models on the Ohio Supercomputer Center's HPC, identifying performance bottlenecks and reducing processing time by 25% by parallelizing model training and evaluation across multiple HPC nodes.

Biomedical Research Intern – Cincinnati Children's Hospital Medical Center (Dr. Anil Jegga) **Cincinnati, OH**
Research Intern *August 2024-March 2025*

- Investigated drug-gene interactions related to pancreatitis utilizing DGIdb and TopGene making the general focus bioinformatics, identifying 5+ novel relationships that may inform future research and contribute to an important publication
- Spearheaded data-driven genetic analysis to identify sulfonamides and azathioprine, directly linking these key compounds to inflammatory pathways and advancing research initiatives in the project

ADDITIONAL INFORMATION

Technical: Python, JavaScript, TypeScript, SQL, HTML/CSS, React, Next.js, Node.js, FastAPI, PyTorch, Git/GitHub, REST APIs, OpenAI/Anthropic APIs, MCP, RAG, AI Agents, Agentic Workflows, CAD, Claude Code, PIM, Cursor, VS Code, Bash Scripting, Market Research, Competitive Analysis, Hardware-Software Integration, Edge AI, Embedded Systems
AI/ML: PyTorch, CNNs, LLMs, RAG, AI Agents, MCP, Agentic Workflows
Languages: English(Fluent), Telugu(Fluent), Hindi(Conversational)
Awards: Winsupply Capstone Project 2nd place, 2x Best Delegate, JHU GHLC Outstanding Presentation Award, Bio-Hackathon 2nd place
Laboratory: Micropipetting, bacteria culture/streak plating, Gram staining, gel electrophoresis, PCR, BLAST sequence analysis
Interests: OSU Origins Dance Team, Digital Art Creator, Video Games, Reading, Public Speaking, Coding
Relevant Coursework: MATH 1172/ 2173, FE 1181.01/1182.01, CHEM 1210/1220, MATH 2174, BIO 1113.01- SEA-PHAGES LAB, PHYS 1250
